

Sprawozdanie Lab6 NET

Poniżej przedstawiam wizualny efekt pracy:

The screenshot displays the Lab7NET vDEV web interface. The top navigation bar includes links for Home, Entities, Administration, and Account. The main content area is divided into two sections: 'user-resource' and 'account-resource'. The 'user-resource' section lists several API endpoints with their respective HTTP methods (GET, PUT, POST, DELETE) and a 'Filter by tag' input field. The 'account-resource' section is currently empty. Below the main content area, a log viewer is visible, showing a list of log entries with columns for Name, Level, and a detailed message. The log entries are filtered by the tag 'user-resource'.

Servers

http://localhost:8080 - Generated server url

Filter by tag

user-resource

- GET /api/admin/users
- PUT /api/admin/users
- POST /api/admin/users
- GET /api/admin/users/{login}
- PUT /api/admin/users/{login}
- DELETE /api/admin/users/{login}

account-resource
